

What is SARE?

Since 1988, the Sustainable Agriculture Research & Education (SARE) program has been the go-to USDA grants and outreach program for farmers, ranchers, researchers and educators who want to develop innovations that improve farm profitability, protect water and land, and revitalize communities. To date, SARE has awarded over \$410 million to more than 8,827 initiatives.

SARE is grassroots with far-reaching impact

Four regional councils of expert practitioners set priorities and make grants in every state and island protectorate.

SARE communicates results

SARE shares project results by requiring grantees to conduct outreach and grower engagement; and by maintaining an online library of practical publications, grantee-produced information products and other educational materials.

SARE: Advancing the Frontier of Sustainable Agriculture in...

Alabama

Project Highlight: Alabama Farmer Helping to Diversify State's Aquaculture Production with Crawfish

David Coddington has successfully owned and operated Greene Prairie Aquafarms in Boligee, Alabama, for twenty one years. Coddington has done so with the help of the Southern SARE Producer grant that he used to study what proper pond salinity acclimation for shrimp is best to protect them from insect predation. This research allowed Coddington's shrimp farm to thrive for years until a sharp decrease in demand for shrimp had significantly cut Coddington's profits. The statewide shift in the aquaculture industry motivated him to raise crawfish to see if they could potentially be a more profitable alternative to shrimp.

To answer this question, Coddington obtained another SARE grant to begin a new study, "Increasing Sustainability of Crawfish and Low Salinity Shrimp Production in West Alabama." This grant helped Coddington analyze how pond depth, salinity and various feeding methods impact the yield of crawfish. In this project, Coddington worked alongside Auburn Alabama Fish Farming Center Extension specialist Luke Roy and farmer Jesse James. Together, they developed an enterprise budget between traditional and deep-water crawfish systems and determined the best feeding methods. In addition, they analyzed the use of short-neck and long-neck traps for harvesting efficacy and impacts on yield to create the best practices that create the most sustainable and profitable aquaculture farm possible.

For more information on this project, see projects.sare.org and search for project number FS20-322.

SARE in Alabama

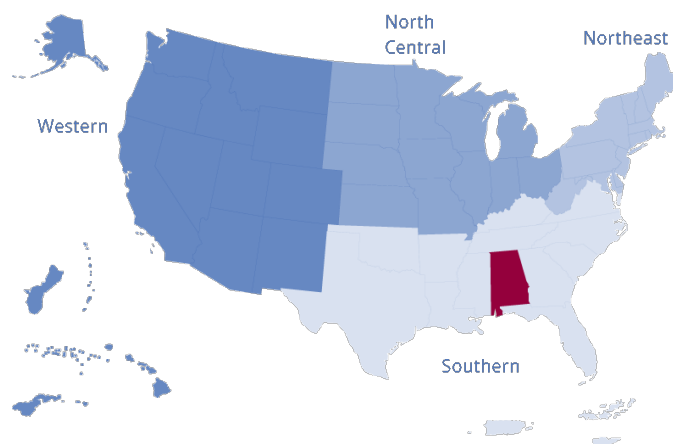

southern.sare.org/state-profiles/alabama/

\$1,953,369
in total funding

22 grant project

(since 1988)

SARE in Alabama

Grants awarded 2019-2024

Total awards: **22 grants**

- 5 Farmer/Rancher
- 4 Research and Education
- 3 Professional Development Program
- 2 On Farm Research/Partnership
- 5 Graduate Student
- 3 Education Only

Total funding: **\$1,953,369**

\$65,122	Farmer/Rancher
\$1,383,700	Research and Education
\$236,436	Professional Development Program
\$36,581	On Farm Research/Partnership
\$82,123	Graduate Student
\$149,407	Education Only

Find a complete list of projects on page 3.

Farmer and rancher impacts 2019-2024

SARE grantees have reported the following impacts from their projects:

4,932 farmers participated in a SARE-funded project

1,447 farmers reported a change in knowledge, awareness, skills or attitude

623 farmers changed a practice

Learn about local impacts at:
southern.sare.org/sare-in-your-state/alabama/

Contact Your SARE State Coordinator

SARE sustainable ag coordinators run state-level educational programs for Extension and other ag professionals, and many help grant applicants and recipients with planning and outreach. Visit southern.sare.org/state-profiles/alabama/ to learn more.

www.SARE.org

SARE is funded by the USDA's National Institute of Food and Agriculture (NIFA).

This report includes summaries of competitive grant programs only. Some competitive grant programs that are no longer offered may be included or excluded from the totals in this report depending on the grant program and SARE region.

AGRICULTURE PROJECTS FUNDED IN ALABAMA

by USDA's
Sustainable Agriculture Research and Education (SARE) Program

Alabama has been awarded \$5,559,431 grants to support 98 projects, including but not limited to, 23 research and/or education projects, 13 professional development projects and 24 producer-led projects. Alabama has also received additional SARE support through multi-state projects.

RESEARCH AND EDUCATION GRANTS

Project #	Project Title	SARE Support	Project Leaders
LS24-398	Integrating tannin-rich legumes into tall fescue pastures to strengthen the sustainability of beef cattle production in the southern United States	\$398,589	Dr. William Smith Auburn University Dr. Leanne Dillard Auburn University Dr. Isaac Mirahki Auburn University Dr. Aghata E. Moreira da Silva Auburn University Dr. James Muir Texas A&M AgriLife Research Dr. Jose D. Pereira-Neto Auburn University
LS23-383	Grazing diversified cover crops as an alternative to improve land-use efficiency and sustainability in the Southeast	\$380,000	Dr. Leanne Dillard Auburn University Dr. Ana Caroline Cerqueira de Melo Vasco Auburn University Dr. Jose Dubeux, Jr. University of Florida - NFREC Dr. Kim Mullenix Auburn University Dr. William Smith Auburn University Dr. Marnin Wolfe Auburn University
