SARE: Advancing the Frontier of Sustainable Agriculture in...  

Kentucky

Project Highlight: *Training Ag Professionals on Sustainable Vegetable Production Methods*

Kentucky is home to numerous small, limited-resource farms. More than 75 percent of the state’s 85,000 farms are smaller than 180 acres and 80 percent have an annual income under $25,000, according to the USDA Census of Agriculture. Tobacco used to be an attractive option for these growers because it was highly profitable at small acreages compared to other crops, but that has changed with the elimination of price supports and marketing quotas.

Extension professionals at state universities in Kentucky and Tennessee are working to fill the void left by tobacco by increasing the acreage of sustainably farmed and certified organic vegetables. For this to happen, training in sustainable and organic vegetable farming for agricultural professionals who work closely with small-scale farmers is critical. With a SARE grant, a team led by the University of Kentucky collaboratively sponsored hands-on workshops, regional farm tours, training materials, videos and websites for farm educators.

The team trained 150 ag professionals and 150 growers. Prior to the training, many of the participants expressed their discomfort with organic vegetable production. Yet nearly 200 attended a field day heavily featuring organic production just a few years later, indicating a growing interest on their part.

For more information on this project, see [sare.org/projects](http://sare.org/projects), and search for project number **ES10-101**.

SARE in Kentucky

[southern.sare.org/sare-in-your-state/kentucky](http://southern.sare.org/sare-in-your-state/kentucky)

$5,087,234 in total funding

99 grant projects

(since 1988)

For a complete list of grant projects state by state, go to [www.sare.org/state-summaries](http://www.sare.org/state-summaries)
SARE Grants in Kentucky

Total awards: 99 grants

- 16 Research and Education
- 6 Sustainable Community Innovation
- 24 Professional Development Program
- 29 Farmer/Rancher
- 7 Graduate Student
- 15 On Farm Research/Partnership
- 2 Education Only

Total funding: $5,087,234

- $2,783,968 Research and Education
- $58,312 Sustainable Community Innovation
- $1,614,759 Professional Development Program
- $244,946 Farmer/Rancher
- $79,398 Graduate Student
- $216,851 On Farm
- $89,000 Research/Partnership
- $5,087,234 Education Only

Find a complete list of projects on page 3.

SARE's Impact

53 percent of producers report using a new production technique after reading a SARE publication.

79 percent of producers said they improved soil quality through their SARE project.

64 percent of producers said their SARE project helped them achieve higher sales.

Learn about local impacts at: southern.sare.org/sare-in-your-state/kentucky

Contact Your SARE State Coordinator

SARE sustainable ag coordinators run state-level educational programs for Extension and other ag professionals, and many help grant applicants and recipients with planning and outreach. Visit southern.sare.org/state-pages/kentucky to learn more.

For detailed information on SARE projects, go to www.SARE.org

SARE is funded by the USDA’s National Institute of Food and Agriculture (NIFA).

This report includes summaries of competitive grant programs only. Some competitive grant programs that are no longer offered may be included or excluded from the totals in this report depending on the grant program and SARE region.
Kentucky has been awarded $5,087,234 grants to support 98 projects, including but not limited to, 15 research and/or education projects, 24 professional development projects and 29 producer-led projects. Kentucky has also received additional SARE support through multi-state projects.
