What is SARE?

Since 1988, the Sustainable Agriculture Research & Education (SARE) program has been the go-to USDA grants and outreach program for farmers, ranchers, researchers and educators who want to develop innovations that improve farm profitability, protect water and land, and revitalize communities. To date, SARE has awarded over $311 million to more than 7,449 initiatives.

SARE is grassroots with far-reaching impact

Four regional councils of expert practitioners set priorities and make grants in every state and island protectorate.

SARE communicates results

SARE shares project results by requiring grantees to conduct outreach and grower engagement, and by maintaining an online library of practical publications, grantee-produced information products and other educational materials.

SARE: Advancing the Frontier of Sustainable Agriculture in...

Oklahoma

Project Highlight: Growing a Local Understanding of Soil Health

Some farming practices commonly used in Oklahoma have reduced the state’s soil quality, leading to soils that are often low in organic matter. To remain productive, attention needs to be placed on improving and monitoring soil quality.

Realizing the importance of such attention, Kefyalew Desta used a SARE grant to obtain local soil quality information and develop a soil quality assessment index that can be used to quantify the overall soil quality status of a farm. As Desta was testing soil properties on-farm, 65 percent of the owners participated in the sampling and discussed the results.

This engagement of the farmers paid off. According to Desta, at the beginning of the project, 65 percent of them did not know the difference between soil health and soil fertility. Following the on-farm sampling and trainings, 80 percent of the farmers are now communicating with ag educators to seek help in soil health analysis. At least 60 percent plan to use on-site soil quality testing as part of their routine soil management. Desta also coordinated in-service trainings and demonstrations, reaching over 200 people.

For more information on this project, see sare.org/projects, and search for project number OS11-058.

SARE in Oklahoma

southern.sare.org/sare-in-your-state/oklahoma

$3,373,238 in total funding

47 grant projects

(since 1988)

For a complete list of grant projects state by state, go to www.sare.org/state-summaries
SARE Grants in Oklahoma

Total awards: **47 grants**
- 13 Farmer/Rancher
- 2 Graduate Student
- 8 On Farm
- Research/Partnership
- 7 Professional Development Program
- 15 Research and Education
- 2 Sustainable Community Innovation

Total funding: **$3,373,238**

- $122,429 Farmer/Rancher
- $19,969 Graduate Student
- $113,934 On Farm
- Research/Partnership $635,389
- Professional Development Program $2,464,653
- Research and Education $16,864
- Sustainable Community Innovation

Find a complete list of projects on page 3.

SARE's Impact

53 percent of producers report using a new production technique after reading a SARE publication.

79 percent of producers said they improved soil quality through their SARE project.

64 percent of producers said their SARE project helped them achieve higher sales.

Learn about local impacts at: southern.sare.org/sare-in-your-state/oklahoma

Contact Your SARE State Coordinator

SARE sustainable ag coordinators run state-level educational programs for Extension and other ag professionals, and many help grant applicants and recipients with planning and outreach. Visit southern.sare.org/state-pages/oklahoma to learn more.

For detailed information on SARE projects, go to www.SARE.org

SARE is funded by the USDA’s National Institute of Food and Agriculture (NIFA).

This report includes summaries of competitive grant programs only. Some competitive grant programs that are no longer offered may be included or excluded from the totals in this report depending on the grant program and SARE region.
AGRICULTURE PROJECTS FUNDED IN OKLAHOMA
by USDA's Sustainable Agriculture Research and Education (SARE) Program

Oklahoma has been awarded $3,373,238 grants to support 46 projects, including but not limited to, 14 research and/or education projects, 7 professional development projects and 13 producer-led projects. Oklahoma has also received additional SARE support through multi-state projects.

### IMPROVING INTEGRATED RESOURCE MANAGEMENT SKILLS OF BEEF PRODUCERS

- **LS96-074**: Improving Integrated Resource Management Skills of Beef Producers
  - SARE Support: $163,642
  - Project Leaders: Damona Doye, Oklahoma State University

- **LS96-079**: Multi-Cropping Cattle and Watermelon in the Southern Plains
  - SARE Support: $54,752
  - Project Leaders: Warren Roberts, Oklahoma State University, Department of Horticulture

- **LS96-081**: Controlling Cheat and Annual Ryegrass in Small Grains Using Novel Crop Harvesting Technologies (AS96-025)
  - SARE Support: $83,624
  - Project Leaders: Thomas F. Peeper, Oklahoma State University

### POST-CRP LAND MANAGEMENT AND SUSTAINABLE PRODUCTION ALTERNATIVES FOR HIGHLY ERODIBLE LAND IN THE SOUTHERN GREAT PLAINS

- **LS94-058**: Post-CRP Land Management and Sustainable Production Alternatives for Highly Erodible Land in the Southern Great Plains
  - SARE Support: $196,100
  - Project Leaders: Thanh H. Dao, USDA ARS

### PEST MANAGEMENT AND ORCHARD FLOOR MANAGEMENT STRATEGIES TO REDUCE PESTICIDE AND NITROGEN INPUTS

- **LS91-036**: Pest Management and Orchard Floor Management Strategies to Reduce Pesticide and Nitrogen Inputs
  - SARE Support: $150,000
  - Project Leaders: Michael Smith, Oklahoma State University

### SUBSTITUTION OF CULTURAL PRACTICES FOR HERBICIDES TO CONTROL ANNUAL RYE GRASS AND CHEAT IN SMALL GRAINS

  - SARE Support: $60,000
  - Project Leaders: John B. Solie, Oklahoma State University

  - SARE Support: $140,000
  - Project Leaders: John B. Solie, Oklahoma State University
