

What is SARE?

Since 1988, the Sustainable Agriculture Research & Education (SARE) program has been the go-to USDA grants and outreach program for farmers, ranchers, researchers and educators who want to develop innovations that improve farm profitability, protect water and land, and revitalize communities. To date, SARE has awarded over \$309 million to more than 7,407 initiatives.

SARE is grassroots with far-reaching impact

Four regional councils of expert practitioners set priorities and make grants in every state and island protectorate.

SARE communicates results

SARE shares project results by requiring grantees to conduct outreach and grower engagement; and by maintaining an online library of practical publications, grantee-produced information products and other educational materials.

SARE: Advancing the Frontier of Sustainable Agriculture in...

Puerto Rico

Project Highlight: *Cover Crops Improve Soil in Plantain Crops*

Cover crops bring many benefits to farming systems, from protecting the soil against erosion to suppressing weeds to improving yields and profitability through healthier soil. In Puerto Rico, a team of researchers, educators and service providers used a SARE grant to start bringing these benefits to one of the island's main crops, the plantain.

Starting In 2013, the research team conducted on-farm experiments to identify cover crops species that could be intercropped with plantains to improve soil health. They focused on jack beans, sunnhemp and sorghum, planted as cover crops both individually and as mixes. The team collected soil samples to measure soil fertility, microbial activity and other indicators of soil health, and they made some important discoveries that should help Puerto Rico farmers make informed decisions about using cover crops. Jack beans established most successfully and showed the most promise overall, whereas rodents and heavy rains impacted the sorghum, and the sunnhemp performed well but was more susceptible to weather conditions than the jack beans.

Most importantly, the cover crop trials revealed an economic benefit. To achieve yields of high-quality plantains by market standards, no nematicides were needed and fungicide applications were reduced 78 percent—representing a cost savings to the farmer.

For more information on this project, see sare.org/projects, and search for project number [FS13-271](#).

SARE in Puerto Rico

southern.sare.org/sare-in-your-state/puerto-rico

\$1,200,643
in total funding

25 grant projects

(since 1988)

SARE Grants in Puerto Rico

Total awards: 25 grants

9 Farmer/Rancher
1 Graduate Student
3 On Farm Research/Partnership
4 Professional Development Program
8 Research and Education

Total funding: \$1,200,643

\$83,633 Farmer/Rancher
\$10,000 Graduate Student
\$42,473 On Farm Research/Partnership
\$158,684 Professional Development Program
\$905,853 Research and Education

Find a complete list of projects on page 3.

SARE's Impact

53 percent

of producers report using a new production technique after reading a SARE publication.

79 percent

of producers said they improved soil quality through their SARE project.

64 percent

of producers said their SARE project helped them achieve higher sales.

For detailed information on SARE projects, go to www.SARE.org

SARE is funded by the USDA's National Institute of Food and Agriculture (NIFA).

This report includes summaries of competitive grant programs only. Some competitive grant programs that are no longer offered may be included or excluded from the totals in this report depending on the grant program and SARE region.

AGRICULTURE PROJECTS FUNDED IN PUERTO RICO

by USDA's
Sustainable Agriculture Research and Education (SARE) Program

Puerto Rico has been awarded \$1,210,643 grants to support 26 projects, including but not limited to, 8 research and/or education projects, 4 professional development projects and 9 producer-led projects. Puerto Rico has also received additional SARE support through multi-state projects.

RESEARCH AND EDUCATION GRANTS

Project #	Project Title	SARE Support	Project Leaders
LS20-329	Agroecosystem Sustainable Guides	\$41,040	Silmarie Crespo ECO-Services Gabriela Medina Finca La Jiba
LS20-330	Agro-Ecological Education for New Farmers in the Central Western Region of Puerto Rico	\$49,992	Paula Paoli Garrido Plenitud PR Bryan Brunner Montes University of Puerto Rico, Mayagüez Owen Ingley Plenitud PR Samantha Lopez Plenitud PR Gina Malley Campos Plenitud PR Rebekah Sanchez Cruz Plenitud PR
LS14-263	Multisectoral and Transdisciplinary Coalition to Spearhead the Development of a Cohesive Network of Local Limited-resources Urban Community Farmers for Sustainable Agriculture Using the Capital City of Puerto Rico as Case Study	\$250,000	Dr.Maria Calixta Ortiz Universidad Ana G. Méndez
LS10-231	Weed management alternatives for organic coffee agroforestry systems of Puerto Rico	\$150,000	Mariangie Ramos University of Puerto Rico at Utuado
LS08-212	Integrating tropical legumes with condensed tannins into ruminant grass-based diets for sustainable production	\$100,000	Dr.Elide Valencia University of Puerto Rico, Mayaguez
LS04-162	Developing legume shade trees for Sustainable coffee production in Puerto Rico	\$195,298	Eduardo Schröder University of Puerto Rico
LS00-111	Structures of Sustainability: A Regenerative Model for Community Agriculture Development	\$19,678	Vivian Carro-Figueroa University of Puerto Rico Agric. Experiment Sta.
LS95-072	Agronomic & Economic Benefits of Intercropping Bean with Banana	\$99,845	Lii-chyuan Liu University of Puerto Rico, College of Agricultural Sciences

PROFESSIONAL DEVELOPMENT PROGRAM GRANTS

Project #	Project Title	SARE Support	Project Leaders
-----------	---------------	--------------	-----------------

ES20-152	Soil Nutrient Management in Tropical Soils	\$69,335	Dr.Daniel Bair University of Puerto Rico, Mayaguez Dr.Miguel Muñoz University of Puerto Rico, Mayaguez Mario Rodriguez USDA-NRCS Caribbean Area
ES19-149	Agroforestry Management for Tropical and Subtropical Agroforestry Systems: Management guide and practical workshops	\$53,609	Andre Sanfioenzo
ES97-033	Alternative Sustainable Practices for Selected Crops in Puerto Rico	\$10,000	Miguel F. Monroig University of Puerto Rico
ES97-035	Integrated Strategic Plan for Sustainable Agriculture	\$25,740	Hipólito O'Farrill-Nieves University of Puerto Rico Agric. Ext. Service

FARMER/RANCHER GRANTS

Project #	Project Title	SARE Support	Project Leaders
FS20-324	Building Soil and Plant Health with Compost and Compost Teas	\$12,443	Gabriela Medina Finca La Jiba
FS17-298	Weed Suppression by Compost Mulch in Plantains	\$8,436	Reed Hepperly Hepperly Enterprises
FS13-271	Cover Crops for Improving Recalcitrant Soil Organic Matter and Soil Biota Management in Plantain Production Systems in Puerto Rico	\$10,000	Duamed Colon-Carrion Agro Tropical, Inc.
FS07-213	Recycling Mushroom Spent Compost	\$8,027	Reed Hepperly Hepperly Enterprises
FS05-193	Organic Farming in the Tropics with Legume Groundcover	\$8,107	Luis Miguel Rico
FS03-172	Puerto Rico Shade Grown Coffee Project	\$9,956	Luis Miguel Rico
FS99-095	Breaking the Herbicide Habit: Integrating Cover Crops with Herbicide Application	\$9,960	Rebecca Perez-Rossello
FS99-098	Demonstrating the Benefits of Agroforestry Practices on Family Farms	\$6,704	Andre Sanfioenzo
FS95-028	Improving Tropical Soils by Utilizing Organic Wastes	\$10,000	Andre Sanfioenzo

GRADUATE STUDENT GRANTS

Project #	Project Title	SARE Support	Project Leaders
GS08-070	The fate of the finca: Smallholders in the Hispanic Caribbean	\$10,000	Gregory Knapp University of Texas at Austin Katia R. Aviles-Vazquez The University of Texas at Austin

ON FARM RESEARCH/PARTNERSHIP GRANTS
