What is SARE?

Since 1988, the Sustainable Agriculture Research & Education (SARE) program has been the go-to USDA grants and outreach program for farmers, ranchers, researchers and educators who want to develop innovations that improve farm profitability, protect water and land, and revitalize communities. To date, SARE has awarded over \$3.6 million to more than 32 initiatives [1].

SARE is grassroots with far-reaching impact

Four regional councils of expert practitioners set priorities and make grants in every state and island protectorate.

SARE communicates results

SARE shares project results by requiring grantees to conduct outreach and grower engagement; and by maintaining an online library of practical publications, grantee-produced information products and other educational materials.

SARE: Advancing the Frontier of Sustainable Agriculture in...

South Carolina

Project Highlight: Fruit Bagging Reduce Reliances on Pesticides

When Clemson University fruit specialist Juan Carlos Melgar suggested putting a paper bag over a peach to detract insects and diseases during production, farmers laughed. But when his SARE-funded trials showed that the technique protects the fruit from devastating brown rot, marauding insects like plum curculio and even hungry birds, producers and backyard growers started paying attention.

Researchers found that bagging peaches between petal fall and harvest reduces pesticide use while increasing yields and maintaining flavor. Even though it involves more labor, Melgar estimated that bagging can increase revenue by \$95 per tree in an organic system when the fruit is sold directly to consumers. "We've gotten a lot of positive responses from farmers all over the country as a result of the research study," said Melgar.

Fruit bagging for protection is a common strategy in Asia. With South Carolina ranked second in the nation behind California in peach production at 77,000 tons, researchers at Clemson felt that applying the technique to orchards was a worthwhile endeavor because peach growers in the southeastern U.S. face very high pest and disease pressures. Melgar is taking this research to a regional level with a newly acquired \$1 million USDA-NIFA grant, applying the technique to more orchards in South Carolina, Georgia and Florida.

For more information on this project, see sare.org/projects, and search for project number OS16-094.

SARE in South Carolina

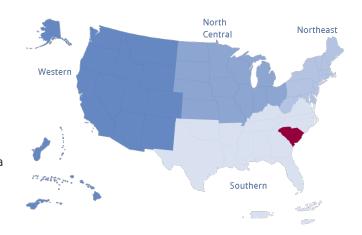

southern.sare.org/state-profiles/south-carolina/

\$3,610,164 in total funding

32 grant projects

(since 1988 [1])

For a complete list of South Carolina grant projects, go to projects.sare.org/state-fact-sheets/

[1] These totals reflect available data; complete information may not be available for all grant programs prior to 2016.

SARE in South Carolina, 2020–2025

This is a summary of recent SARE-funded activities and impacts in the state. To search all SARE projects visit projects.sare.org. For a list of all projects in South Carolina visit projects.sare.org/state-fact-sheets/.

Grants awarded

Total awards: 32 grants

- 4 Farmer/Rancher
- 8 Research and Education
- 4 Professional Development Program
- 1 On Farm Research/Partnership
- 4 Graduate Student
- 8 PDP State Program [2]
- 3 Education Only

Total funding: \$3,610,164

\$55,435 Farmer/Rancher

\$2,822,107 Research and Education

\$309,962 Professional Development Program

\$20,000 On Farm Research/Partnership

\$57,383 Graduate Student

\$209,777 PDP State Program [2]

\$135,500 Education Only

[2] The Professional Development Program (PDP) State Program is a noncompetitive award that funds the activities of the state coordinator(s). See more below.

Farmer and rancher impacts

SARE grantees have reported the following impacts from their projects:

2,103 farmers participated in a SAREfunded project

199 farmers reported a change in knowlege, awareness, skills or attitude

25 farmers changed a practice

Learn about local impacts at: southern.sare.org/sare-in-your-state/south-carolina/

Contact Your SARE State Coordinator

SARE sustainable ag coordinators run state-level educational programs for Extension and other ag professionals, and many help grant applicants and recipients with planning and outreach. Visit southern.sare.org/state-profiles/south-carolina/ to learn more.
