What is SARE?

Since 1988, the Sustainable Agriculture Research & Education (SARE) program has been the go-to USDA grants and outreach program for farmers, ranchers, researchers and educators who want to develop innovations that improve farm profitability, protect water and land, and revitalize communities. To date, SARE has awarded over $389 million to more than 8,542 initiatives.

SARE is grassroots with far-reaching impact

Four regional councils of expert practitioners set priorities and make grants in every state and island protectorate.

SARE communicates results

SARE shares project results by requiring grantees to conduct outreach and grower engagement; and by maintaining an online library of practical publications, granteeproduced information products and other educational materials.

SARE in Texas

southern.sare.org/sare-in-your-state/texas

$11,062,269 in total funding

140 grant projects (since 1988)

For a complete list of grant projects state by state, go to www.sare.org/state-summaries

SARE: Advancing the Frontier of Sustainable Agriculture in...

Texas

Project Highlight: Training for a Sustainable Agriculture Future

Thousands of Texas ranchers hurt by drought are seeking new ways to make their land profitable. Large Texas farms are being subdivided. Farms of all sizes are now in closer contact with non-agricultural communities due to urban growth. Agriculture in Texas is changing, and the technical professionals who support producers must keep up by learning innovative, research-based production and marketing strategies relevant to their clientele’s interests. This need prompted Texas A&M Extension educators to organize a SARE-funded training program on the sustainable and organic practices that are of emerging interest to Texas’ farmers and ranchers. The program reached 45 employees of Texas A&M and Prairie View A&M Extension, and the USDA Natural Resources Conservation Service. It included hands-on farm training conducted at six locations, with classroom presentations and discussions over four days. Eleven farmers and ranchers served as trainers during the on-site visits. Participants reported back on what they did in their communities as a result of their involvement in the program. Five months after conclusion of the training, they brought information about sustainable and organic practices to 1,000 farmers in 37 different counties through a combination of events and one-on-one outreach.

For more information on this project, see sare.org/projects, and search for project number ES13-120.
SARE Grants in Texas

Total awards: 140 grants

- 41 Research and Education
- 4 Sustainable Community Innovation
- 12 Professional Development Program
- 27 Farmer/Rancher
- 32 Graduate Student
- 21 On Farm Research/Partnership
- 3 Education Only

Total funding: $11,062,269

- $8,961,600 Research and Education
- $40,000 Sustainable Community Innovation
- $892,240 Professional Development Program
- $271,338 Farmer/Rancher
- $410,026 Graduate Student
- $358,398 On Farm Research/Partnership
- $128,667 Education Only

Find a complete list of projects on page 3.

SARE's Impact

53 percent
of producers report using a new production technique after reading a SARE publication.

79 percent
of producers said they improved soil quality through their SARE project.

64 percent
of producers said their SARE project helped them achieve higher sales.

Learn about local impacts at: southern.sare.org/sare-in-your-state/texas

Contact Your SARE State Coordinator

SARE sustainable ag coordinators run state-level educational programs for Extension and other ag professionals, and many help grant applicants and recipients with planning and outreach. Visit southern.sare.org/state-pages/texas to learn more.

For detailed information on SARE projects, go to www.SARE.org

SARE is funded by the USDA’s National Institute of Food and Agriculture (NIFA).

This report includes summaries of competitive grant programs only. Some competitive grant programs that are no longer offered may be included or excluded from the totals in this report depending on the grant program and SARE region.
Texas has been awarded $11,062,269 grants to support 139 projects, including but not limited to, 40 research and/or education projects, 12 professional development projects and 27 producer-led projects. Texas has also received additional SARE support through multi-state projects.

Allelopathic effects of small grain cover crops on cotton plant growth and yields

Cropping systems for sustainable nutrient management and dairy production

Cycling of composted biosolids through turfgrass sod enhances sustainability across agricultural and urban landscapes

Development of Methodology to Measure Net Feed Efficiency in Bulls to Enhance Profitability and Environmental Sustainability of Beef Production

Optimizing Water Use for Three Old World Bluestems in the Texas High Plains

Assessing Impacts of Grazing Management on Pollinator Conservation in Rangeland

Hi-A Corn and Management Practices for Nutritional and Food and Feed

Promoting Water Sustainable Agriculture by Combining In-situ Soil Moisture and Remote Sensing Data for Irrigation Scheduling

Introducing Beneficial Entomopathogenic Nematodes for Biological Control and Enhanced Plant Resistance to Improve Pest Management in Cucurbit Crops

Strategic Management of Legume Cover-forage Crops to Optimize Utility in a Challenging Environment

Incorporating Native Plants in Insectary Strips to Promote Insect Diversity and Belowground Beneficial Microbes

Sustainable Pasture Management in Texas: Optimizing forage production and nutrient use in various environments and soils

Advancing the Frontier of Legume Cover Crops and Building Integrated System Resilience in Semi-arid West Texas

Supporting Alternative Crop Options Through Improved Fertility Recommendations for Canola in Central and South Texas

ON FARM RESEARCH/PARTNERSHIP GRANTS
