# What is SARE?

Since 1988, the Sustainable Agriculture Research & Education (SARE) program has been the go-to USDA grants and outreach program for farmers, ranchers, researchers and educators who want to develop innovations that improve farm profitability, protect water and land, and revitalize communities. To date, SARE has awarded over \$3.1 million to more than 53 initiatives [1].

# SARE is grassroots with far-reaching impact

Four regional councils of expert practitioners set priorities and make grants in every state and island protectorate.

### **SARE** communicates results

SARE shares project results by requiring grantees to conduct outreach and grower engagement; and by maintaining an online library of practical publications, grantee-produced information products and other educational materials.

#### SARE: Advancing the Frontier of Sustainable Agriculture in...

# Virginia

Project Highlight: Fighting Downy Mildew with Better Crop Selection

Seed crop growers of cucumbers, squash, melons, gourds and watermelons have faced severe losses in Virginia from downy mildew. To stem these losses and to reduce the economic impact, seed grower Edmund Frost used a SARE grant to find varieties of melons, cucumbers and winter squash able to withstand downy mildew. By finding such varieties, he could share results with other seed growers and gather information needed to make progress with seed production and breeding of the resistant varieties.

Frost conducted trials that identified 15 cucumber varieties with the ability to produce twice as much as standard varieties labeled "resistant," 20 winter squash and tropical pumpkin varieties with better downy mildew resistance than other varieties, and several varieties that produce good-quality melons in areas with high downy mildew pressure.

While the identified pumpkin varieties showed downy mildew resistance, there were quality problems that Frost looked at in a second SARE-funded project. Frost made significant progress with three pumpkin varieties and shared the results with growers at two conferences. One of the seeds bred during the project, F6 Seminole-Waltham seed, is now being sold to growers.

For more information on these projects, see <a href="mailto:sare.org/projects">sare.org/projects</a>, and search for project numbers FS13-273 and FS16-291.

#### SARE in Virginia, 2020–2025

This is a summary of recent SARE-funded activities and impacts in the state. To search all SARE projects visit projects.sare.org. For a list of all projects in Virginia visit projects.sare.org/state-fact-sheets/.

#### Grants awarded

### Total awards: 53 grants

- 12 Farmer/Rancher
- Research and Education
- 3 Professional Development Program
- 8 On Farm Research/Partnership
- 11 Graduate Student
- 3 Education Only
- 11 PDP State Program [2]
- 1 Community Foods Project

### Total funding: \$3,098,796

\$205,177 Farmer/Rancher \$1,349,987 Research and Education \$224,982 Professional Development Program \$173,057 On Farm Research/Partnership \$201,016 Graduate Student \$149.885 Education Only \$294,777 PDP State Program [2] \$499,915 Community Foods Project

[2] The Professional Development Program (PDP) State Program is a noncompetitive award that funds the activities of the state coordinator(s). See more below.

For a complete list of Virginia awards, visit: projects.sare.org/state-fact-sheets/

#### Farmer and rancher impacts

SARE grantees have reported the following impacts from their projects:

22,939 farmers participated in a SAREfunded project

867 farmers reported a change in knowlege, awareness, skills or attitude

#### 228 farmers changed a practice

Learn about local impacts at: southern.sare.org/sare-in-your-state/virginia/

#### **Contact Your SARE State Coordinator**

SARE sustainable ag coordinators run state-level educational programs for Extension and other ag professionals, and many help grant applicants and recipients with planning and outreach. Visit southern.sare.org/state-profiles/virginia/ to learn more.
